

Knowledge Organiser- The World Around Us

What do we know already?			EQ1 – What makes a community?		EQ2 – Why do maps have symbols?			
- A map can tell us where to go - That a journey can take us to a new place - That in our local area we have different things to help us, like shops.			☐ Geography		A community is a group of people that live close together or share an interest.	○ Geography		A map shows you what is in a space and where.
					A landmark is an object that you know and recognise.			We use symbols to help show an object in a space.
					A human feature is something that has been made, like a shop. A physical feature is something that exists already, like a river.			An aerial view is a snapshot from up high/ above.
1. EQ3 – Does my local area always look the same?			EQ4 – How could we improve the environment of our local area?					
☐ Science		There are 4 seasons. They have different weather and are at different times in the year.	☆ Science		Your environment is what you can see around you.
